➤ Summary:

Motivated and detail-oriented MCA student with a strong foundation in programming, web development, databases, networking, and problem-solving. Passionate about learning new technologies and applying technical skills to solve real-world challenges. Seeking an entry-level opportunity to contribute to organizational growth while enhancing my professional and technical expertise.

➤ Education Qualifications:

College Name	Course	Year of Passing	Score
Aditya Institute of Management Studies and research	Master of Computer Applications (MCA)	2027	Currently Pursuing
Guru Nanak College of Arts, science and commerce	Bachelor's in Information technology (B.Sc. IT)	2025	A+
The Andhra Education Society's Jr college	HSC General science (PCMB)	2023	57.50%
The Andhra Education Society's High school	SSC	2020	78.20%

➤ Projects:

• Intelligent Blood Engine

Currently developing Intelligent Blood Engine, an AI-powered Blood Donation and Emergency Response System using React.js. The project focuses on connecting donors, hospitals, and patients through features such as user authentication, emergency blood requests, profile management, and an admin dashboard. The application is being designed for future integration with Node.js, Express.js, and MongoDB.

• Project Autopsy

Developed Project Autopsy, an AI-powered GitHub Repository Forensic Analysis Platform that evaluates repository health, contributor activity, dependency risks, and sustainability. The

system leverages GitHub APIs and AI-driven analytics to generate predictive insights and forensic reports, helping developers make informed decisions about open-source projects.

- **Project “SDN Topology Visualizer”**

Developed a real-time Software Defined Networking (SDN) topology visualization system using Mininet and the Ryu SDN Controller. Built an interactive dashboard to monitor network devices and topology connections in real time using React, Flask, and D3.js. Gained practical exposure to networking concepts, OpenFlow protocol, Linux environment, and network emulation.

- **Project “CityIQ”**

Developed CityIQ, a full-stack smart city platform that combines real-time data from several external APIs (Transport APIs, AQICN, and Open Weather) into a single, cohesive REST API. Constructed using Node.js, Express, React, and MySQL, it features a futuristic React dashboard, Clerk-based authentication, and data caching.

- **Project “Portfolio website Automation Tool”.**

A tool that helps users create resumes based on their requirements. This project was made using HTML, CSS and JavaScript in the frontend, SQLite in the database and Python with Flask framework in the backend.

➤ **Skills**

Technical Skills:

Java | Python | C# | JavaScript | HTML | CSS | React.js | ASP.NET | ASP.NET MVC | .NET Core | Flask | Flutter | Dart | MySQL | SQL Server | REST APIs | TCP/IP | SDN | Linux

Soft Skills:

Communication | Presentation | Team Collaboration | Problem Solving | Quick Learner | Positive Attitude

➤ **Volunteering Experience:**

- **NSS Volunteer** (2022 – 2024)- Participated in community service and social initiatives.
- **Gender Champions Volunteer** 2023 – 2024)- Contributed to awareness and outreach activities.
- Participated in Zeal Technical & Cultural Fest (2022).
